-

Technical Work Experience

Incognito Software Systems Inc.

Quality Assurance Engineer

Vancouver, BC

September, 2020 – April, 2021

- Operated as part of an agile team which develops over 8 different software services
 - Designed and implemented Selenium test suite for Firmware Management Service
 - Stabilized Jenkins environment with excess of 600 test cases
 - Worked daily with industry-standard software solutions such as:
 - * Java, JUnit, IntelliJ, and Linux to effectively write professional software tests;
 - * Jenkins, Postman, Wireshark, and MongoDB to debug services and investigate networking problems;
 - * Jira, BitBucket, and Microsoft Teams for managing workflow and communicating with my team.
-

Education

Simon Fraser University

B.Sc. in Computing Science and Molecular Biology & Biochemistry

Expected Graduation: Fall 2022

- **Relevant Coursework:** Database Systems I, Artificial Intelligence Survey, Introduction to Software Engineering, Biomedical Computing, Data Structures and Programming, Introduction to Computer Science I & II
-

Personal Projects

DockerMan

Node.js, Express.js, React

- Modular server back-end which utilizes Node.js and Docker to serve containers on the same web domain
 - Integrated with React for front-end interactive user dashboard, which includes:
 - * Container control panel to start/stop/restart or port-forward individual containers to a URL slug;
 - * System configuration screen to control security features, such as preventing too many login attempts;
 - * Log screen which displays database of log messages.
-

Volunteer Experience

Vancouver Startup Week

Account Manager

Vancouver, BC

February, 2021 – Present
